

Conor Sheridan

Software Engineering · 021 280 1609 · conorsheridan39@gmail.com · Auckland, NZ

PROFILE

Penultimate-year Software Engineering student at the University of Auckland with experience in Object-Oriented Programming, front-end development, and computational problem solving. Seeking a Summer Software Internship where I can make a meaningful contribution, learn quickly, and further develop my skills.

EXPERIENCE

Duck Island, Ponsonby | Ice Cream Scooper *Dec 2025 – Present*

- Delivered excellent customer service in a high-volume, fast-paced environment.
- Maintained product quality and presentation standards consistently across busy service periods.

Herne Bay Cellars, Ponsonby | Wine Shop Manager *Dec 2024 – Feb 2026*

- Obtained Off-Site Liquor Control Qualification (LCQ) to permit alcohol sales.
- Managed store operations, stock, and customer service independently during shifts.
- Built rapport with regular customers and handled transactions and end-of-day procedures.

PROJECTS

Med Revue Website & Ticketing System *MongoDB · React · Express · TypeScript · CSS*

- Full-stack web app built for the University of Auckland's WDCC, revamped for the 2026 Production.
- Redesigned the UI using React and TypeScript, added a past-productions gallery, and rebuilt the ticketing system with MongoDB and Express for reliable data handling.
- Reformed the application to better showcase the production to potential sponsors.

Trial AI – AI Courtcase Game *Java · CSS*

- Courtroom simulation where the player judges whether an AI acted justly in an emergency scenario.
- Developed collaboratively with 2 teammates in Java — features interactable NPCs with state-dependent dialogue, a final judgement screen, and a concurrent countdown timer.
- Demonstrated strong OOP design, team-based version control via GitHub, and full application lifecycle management.

SESA × DEVS Beginners Hackathon – Student Study Hub

- Collaborated in a team of 5 to build a student study tool in response to a prompt to help someone online.
- Product featured a Pomodoro timer, study notes, live clock, and date display — awarded Best Design out of all competing teams.
- Gained hands-on experience in rapid prototyping, team collaboration, and delivering a polished product under time pressure.

EDUCATION

University of Auckland

BE (Hons) – Software Engineering

Feb 2024 – Nov 2027 (expected)

GPA: 6.83

A+ SOFTENG 281 (OOP) · A ENGGEN 131

TECHNICAL SKILLS

Languages: Java, TypeScript, SQL, React, C, Python

Tools: GitHub, VS Code, Linux OS

Concepts: OOP, Data Structures, Algorithms

AWARDS & ACHIEVEMENTS

- UoA Academic Excellence Scholarship (\$5,000)
- Winner, EPRO8 Interschool Engineering Competition
- High Distinction (Top 1%) – ICAS Mathematics
- Distinction – Australian Mathematics Competition
- Lead roles in National Youth Theatre

INTERESTS

- Musical Theatre – 10 years of performance experience in lead and ensemble roles across National Youth Theatre productions, developing strong stage presence, teamwork, and discipline under pressure.
